## **Parallel Derivative Action Settlements Update**

Article By:

Laarni T. Bulan

Matthew Davis

This page provides an update on the research described in *Parallel Derivative Action Settlement Outcomes*, incorporating more recent data. The original publication provides additional detail on the sample, methodology, and assumptions.

As shown in Cornerstone Research's <u>Securities Class Action</u> <u>Settlements—2022 Review and Analysis</u>, 48% of securities class actions with settlement hearings between 2019 and 2022 had derivative suits with similar claims. This research update analyzes settlement outcomes for 95 of these parallel derivative actions.

• 24% of these derivative settlements included a monetary component other than plaintiff attorney fees ("monetary settlements"), while 76% included therapeutic provisions only ("non-monetary settlements").

- The median derivative settlement was \$12.0 million among monetary settlements.
- 57% of monetary settlements were settled in the Delaware Court of Chancery, the District of Delaware, or the Southern District of New York.
- The median plaintiff attorney fee award was \$3.2 million among monetary settlements and approximately \$590,000 among cases with therapeutic provisions only.
- Among monetary settlements, 30.4% had a corresponding SEC action, and 13.0% had corresponding criminal charges.

## PARALLEL DERIVATIVE ACTION SETTLEMENTS SAMPLE

Type of Settlement	Number of Cases	Percentage of Cases
urities Class Action Settlements (2019–2022)	342	
Parallel Derivative Actions	165	48%
allel Derivative Action Settlements	95	
Monetary Settlements	23	24%
Therapeutic Provisions	83	87%

Monetary settlements are settlements featuring a monetary component other than reimbursement of plaintiff attorney fees. Percentages do not add 100%, as some monetary settlements also include therapeutic provisions. The parallel derivative action settlements identified in this research settled een 2013 and 2023.
